

# ARPA-H OVERVIEW

The Office for Research Development is hosting a 60-minute webinar by Lewis-Burke and Associates to provide an overview of ARPA-H on:

**FRIDAY, MAY 5, 2023 AT 1:30PM**

There will be time for Q&A. You must **RSVP** by May 3rd to receive the link to the webinar.

## ABOUT ARPA-H:

Modeled after the Defense Advanced Research Projects Agency (DARPA), ARPA-H was launched in March 2022 and is tasked with advancing high-risk, high-reward research with transformative potential to drive biomedical and health innovation. The agency currently has a budget of \$2.5 billion available through fiscal year (FY) 2025 and has an Open BAA (through 3/14/24) for proposals in these four announced focus areas, in addition to the reignited Cancer Moonshot Initiative:

1. **Health Science Futures:** A disease agnostic approach to accelerating advances across research areas and removing limitations that stymie progress towards solutions.
2. **Scalable Solutions:** Addressing challenges that include geography, distribution, manufacturing, data and information, and economies of scale to create programs that result in impactful, timely, and equitable solutions.
3. **Proactive Health:** Preventative programs will create new capabilities to detect and characterize disease risk and promote treatments and behaviors to anticipate threats to Americans' health, whether those are viral, bacterial, chemical, physical, or psychological.
4. **Resilient Systems:** Developing capabilities, business models, and integrations to weather crises such as pandemics, social disruption, climate change, and economic instability.

## PRESENTER: LEWIS-BURKE ASSOCIATES (LBA)

Lewis-Burke Associates (LBA) is UVA's federal relations partner that specializes in advocating for the public policy interests of institutions of higher education and other research and education organizations.

You must **RSVP** by May 3rd to receive the link to the webinar.
